

**First Community Bank of Galena  
Hosts Screening To Detect Your Risk  
For Stroke in Less than Ten Minutes!**

**Community Club Members Save \$35!**

"Having screened before, I decided it was time I check again. I am now thankful I did. I had previously had a small amount of plaque in my Carotid Arteries, but there was now 70%+ blockage. I have just returned home from surgery." **Karrol Tipton - Freeport, IL**

"I had been walking around with leg pain for a long time, but had no idea it was Peripheral Arterial Disease. You found my problem right away. I have had surgery on my right leg and I am now able to walk free of pain." **Dorothy Taylor - Kewanee, IL**

**Four Life Saving Screenings**

Stroke Screening	Abdominal Aortic Aneurysm	Peripheral Arterial Disease	Osteoporosis
This screening visualizes the buildup of fatty blockage in the carotid arteries. This condition causes the majority of strokes.	This screening visualizes the existence of an aneurysm in the abdominal aorta that can rupture and be fatal.	This screening checks for blockage in the legs. Abnormal results indicate high risk of coronary artery disease and peripheral arterial disease.	This test screens for abnormal bone density. Both men and women can prevent Osteoporosis with early detection and treatment.

**Community Club Members \$100**
